R290

HYUNDAI

Air to Water Heat Pump

Monoblock
R290
Air Source Heat Pump

Natural refrigerant R290

R290, a highly pure propane with zero ODP value, does not have ozone depletion potential. The low GWP value further demonstrates its environmental protection characteristics, which provides great support to reach EU carbon neutrality. Thanks to the excellent thermodynamic properties of R290 and the advanced heat pump technology, with only a small amount of R290, Monoblock R290 heat pumps show great performance under cold condition. So it is a modern solution that balances ecosystem requirements with economic performance.

Wide capacity range

Capacity (kW)		4	6	8	10	12	14	16
Power supply	220~240V-1N-50Hz	●	●	●	●	●	●	●
	380~415V-3N-50Hz					●	●	●
Appearance								

Electric heater

Electric heater is an ideal option that balances thermal comfort with economy performance under extreme cold climate.

The electric heater with 3~9kW heating capacity can be integrated inside heat pump, which is both a installation space-saving and installation cost-effective solution.

Powerful heating

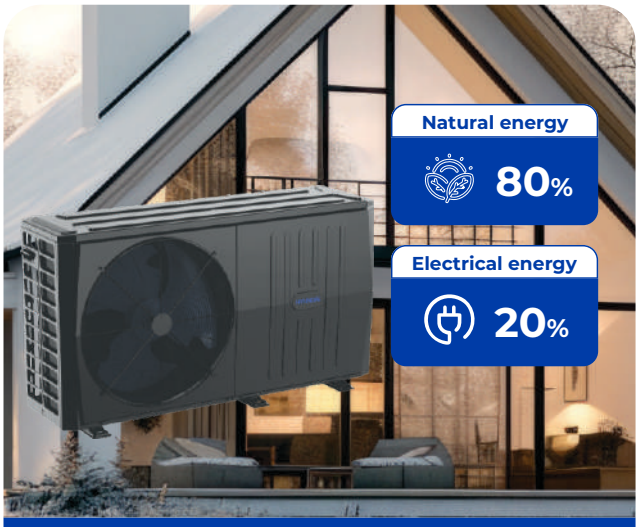
55°C hot water under -25°C ambient temperature

75°C hot water under -10°C ambient temperature

Ideal for replacement

The main energy source for Monoblock heat pump is free-of-charge natural energy from the air. With only a small amount of electrical energy, Monoblock heat pump can provide heat for your house. Compared with boiler, Monoblock heat pump is a more efficient product with environmental protection. On the other hand, the powerful heating capacity of providing 75°C hot water makes it suitable for replacing or retrofitting the current heat source.

Traditional boiler heating



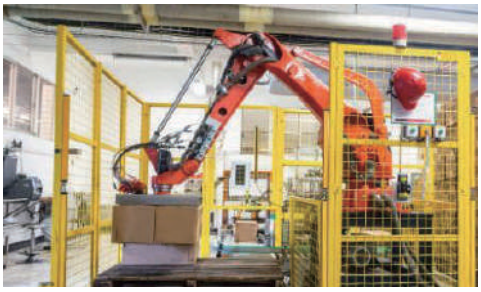
Heat pump heating

The data is only applied for some models under A7W35, which is for understanding and reference only.
The result may vary depending on different products.
Please refer to the specification for more details.

High reliability

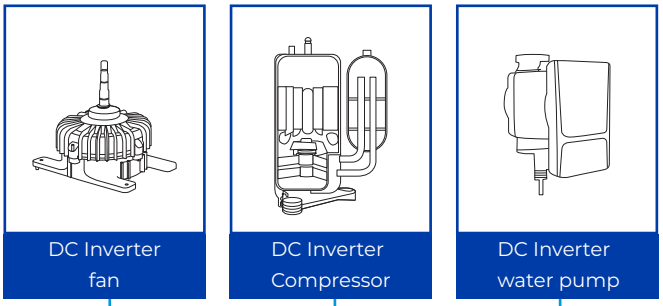
R290 Monoblock heat pump adopts well-known brand components and advanced manufacturing processes to ensure product reliability. It is worth mentioning that, in order to best reassure customers about the use of R290 heat pump, the electric control system adopts a hermetic design to further improve the overall reliability.

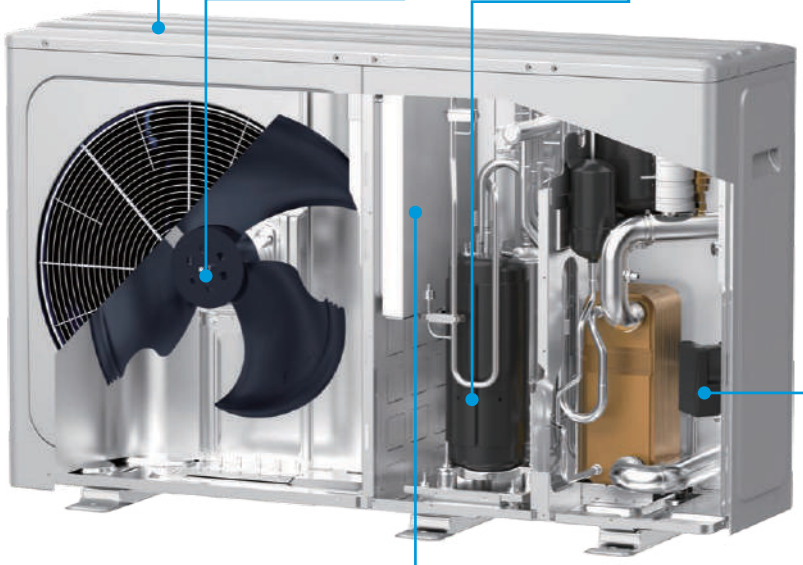
1. Advanced manufacturing technology



2. All DC Inverter components

DC Inverter



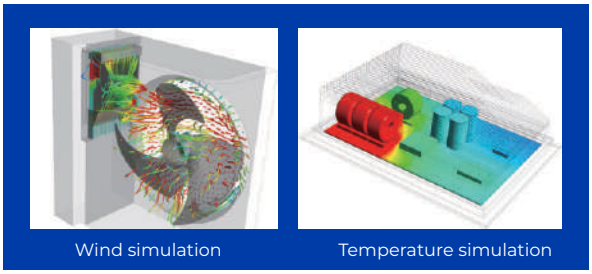


3. Hermetic electric control box

- Excellent sealability

- Explosion-proof design

Thanks to the special air flue design and multiple simulations, the heat dissipation rate of electric control system has been greatly improved, which provides a strong support for heat pump to run stably under -25°C~46°C wide ambient temperature range



High efficiency

Energy efficiency label indicates the energy efficiency level and performance data of heat pump. The purpose of energy efficiency label is to provide necessary information for users to make purchase decisions, so as to help users to choose highly energy-efficient and energy-saving products. With the help of all DC inverter technology, R290 Monoblock Series reaches the EU Energy Efficiency A+++ at 35°C water temperature, A++ at 55°C water temperature, which ensures users get a better experience with a more economical and reasonable cost .

User friendly controller

- Color screen
- Intuitive interface
- Touch-key design
- Liquid crystal display
- Built-in Wifi module
- Modbus protocol
- APP control
- Non-polarized wiring connection

iLetComfort APP

- Designed for end-user
- Easy setting
- Monitor unit status and energy consumption
- Convenient remote control
